Subject: Passive samplers - general information
[EPA 2012 SAMs passive samplers.pdf](#)

Hi Dave – on the Aerovox call last Thursday you mentioned that you weren't that familiar with the use of passive samplers for sediment characterization. I'm not sure if you have seen the 2012 EPA guidelines for using passive samplers, which I have attached for reference. This is probably way more information than you want, but it's a good reference about how they work. In the introduction on page 3 of the PDF (page 1 of the guidelines), I highlighted in yellow how we propose to use them to support Aerovox interim cap design and monitoring.
